OBJECTIVE

Seeking to apply my expertise in front-end web development and technical prowess as a Full Stack Developer. Dedicated to spearheading transformative projects, from concept to execution, and delivering top-tier solutions that drive measurable outcomes. Committed to mastering diverse technologies, including both frontend and backend stacks, to excel as a multifaceted engineer. Eager to contribute my skills and drive success in future endeavours, leveraging a holistic understanding of software development to tackle complex challenges head-on.

PROJECTS

College Website | HTML, CSS, JavaScript and React Js

Developed a dynamic and responsive college website using HTML, CSS, and JavaScript to enhance user experience and accessibility.

Implemented interactive features and animations using React JS, elevating the website's functionality and user engagement.

Collaborated with a team to design and deploy the website, demonstrating effective communication and teamwork skills in a project-based environment.

SKILLS

Programming Languages – C, C++

Frontend – HTML5, Tailwind CSS, JavaScript, React.js, Next.js

Backend – Node.js, Express.js, Firebase

Database – SQL, NoSQL, MongoDB
